Dear Professor Heun:

Subject: Editor's decision from *The Energy Journal*

Submission (with Gregor Semieniuk and Paul E. Brockway) titled "Energy, expenditure, and consumption aspects of rebound, Part II: Applications of the framework"

Thank you for sending your revision to *The Energy Journal*. I have had it reviewed again by the critical referee who is satisfied with your revisions. I am pleased to accept your paper for publication. Please send your final copy with a matching PDF to energyjournal@iaee.org.

We stress the importance of our "General Guidelines for Digital Manuscript Submission" instructions below. Please have a close look at these, particularly in the areas of tables, equations, references and illustrations/figures to ensure your article follows the style for *The Energy Journal*. Please be aware of excessive stacked equations and general sloppiness.

In addition to your finalized manuscript, please submit a 2-3 sentence description of your work for use on the Association's social media accounts (Twitter account @IA4EE and LinkedIn <https://www.linkedin.com/groups/3047782/>). This summary should be accessible to a wider audience and highlight the importance/relevance of your research and its findings. We recommend adding a visual medium, such as a picture/graph relevant to the article. Please provide your Twitter username if you wish to be tagged.

As part of your review of available literature we encourage you to examine previous articles published in our publications *The Energy Journal* and *Economics of Energy & Environmental Policy* and, where related and relevant, cite those articles as part of your submission. All of our articles are available online at:

Search the Energy Journal Article Database:

<http://www.iaee.org/en/publications/ejsearch.aspx>

Search the Economics of Energy & Environmental Database:

<http://www.iaee.org/en/publications/eeepsearch.aspx>

It is the responsibility of the author(s), prior to submission of final documents, to ensure that the paper has been thoroughly proofread and copy-edited.

Sincerely yours,

Adonis Yatchew, Ph.D.

The Energy Journal

GENERAL GUIDELINES FOR DIGITAL MANUSCRIPT SUBMISSION

The Energy Journal accepts Microsoft Word or LaTeX files for submission. At this time we do not accept Mac files. Label files with AUTHORNAME.doc. Please include a matching PDF file for a visual reference. You will be providing an MS Word or LaTeX file (see ACCEPTABLE SOFTWARE below for further submission detail) AND a PDF file of your completed paper.

NOTE: Please reference back issues of *The Energy Journal* for accepted layout styles and formatting from previously published articles.

SUBMISSION GUIDELINES

ACCEPTABLE SOFTWARE: Any version of Microsoft Word 1993 (Word 6) through 2019 is acceptable. If you used Track Changes, please "accept all changes" prior to submission.

TITLE: The main title should be no more than 40 characters and may have a subtitle for clarification.

ABSTRACT: A concise abstract of no more than a paragraph consisting of 600-900 characters (100-150 words including spaces) must be included. Authors are required to supply KEYWORDS with their abstract.

TEXT: Times New Roman 10 pt. or similar. **Paper size:** 8.5" x 11". **Margins:** left 1", Right 3"

SPELLING: U.S. English and the *Webster's New World Dictionary* should be followed for spelling.

FOOTNOTES: Times New Roman 8 pt. Footnotes are numbered in superscript in text. Placement is bottom of each page. No line is included above footnote. Do not use *op. cit.*, *idem*, and *loc. cit.* in notes. Our style does not use endnotes.

NUMBERS: One to ten (spell out); above 11 use digits. SI units, metric system preferable.

MATH AND EQUATIONS: Equations should be in italic type and identified by consecutive Arabic numbers in parentheses at the right side of the page. Math should be prepared using Equation Editor in Word. Articles should carry no more than 12 complex equations (defined as multi-line or stacked equations). Please try to be as consistent as possible in your use of math coding. Stand-alone math should be coded as such and not inserted as graphics or keyed as regular text. Inserting graphics or keying as regular text usually means the math will be re-keyboarded and recoded; increasing the processing and proofing time.

TABLES: Use the Table Insert/Edit tool in Microsoft Word to prepare your tabular material for submission. Number tables consecutively and give a concise caption. If you are sending tables in separate files, please be sure to place call outs in your Word file and use logical file naming conventions for the separate tabular files to ease with identifying placement in your article. The tabular material can also be incorporated into your text file. **Tables should be created using shades of gray. Please do not submit tables that use hash marks. Color tables may be provided separately for online usage.** Tables should also not be inserted as graphics as this presents similar problems to composition as does math submitted as graphics. See back issues of EJ for examples. (see publications page on IAEE website: <http://www.iaee.org/en/publications/journal.aspx>)

ILLUSTRATIONS AND FIGURES: Illustrations and graphs should be in black and white and referred to as Figures. Files must be supplied as 1) original Excel chart, 2) vector-based EPS artwork (originally created

in Adobe Illustrator or Freehand), or 3) high-resolution – 300 dpi – TIFF files. Color images may be submitted in addition to the black and white figures for placement online.

LATIN TERMS: Put common terms in roman type (ibid., et al., de facto, etc., e.g., i.e.,)

REFERENCES: EJ style uses AUTHOR(DATE) system for references in 8 point type (See EXAMPLES below); include page numbers.

Titles of books and journals shall be in *italic* typeface. For example:

Journals: Aigner, D.J., C.A. Lovell and P. Schmidt (1977). "Formulation and Estimation of Stochastic Frontier Production Function Models." *Journal of Econometrics* 6(2): 21-38.

Books: Pindyck, R. (1990). *The Structure of World Energy Demand*. Cambridge: MIT Press. pp. 36-38.

Smith, Alan and J.F. Helliwell (1980). "Economic Modelling of Energy Supply." In W.T. Ziemba et al., eds., *Energy Policy Modelling: U.S. and Canadian Experiences*. Anaheim: ACTA Press. pp. 314-19.

PROOFS: Authors are responsible for ensuring that all manuscript content is correct before final submission. Typeset page proofs will be sent to authors before publication. Proofs must be checked and returned promptly.

Copying Editing Watch Points for *The Energy Journal*

- ◆ Files should be Word or LaTeX documents and should be accompanied by a matching PDF
- ◆ References/footnotes following Chicago Manual style
- ◆ Double quotation marks should be used to enclose quoted material
- ◆ Complete author details and email contact
- ◆ Every article must come across with keywords
- ◆ Capitalization in subheads, table & figure titles consistent
- ◆ Footnote references (superscript numbers) that precede punctuation need to be changed
- ◆ Change US to U.S.
- ◆ Ensure correct punctuation in table & figure titles
- ◆ Ensure graphics are legible and will be legible in b/w or request better quality from source
